

Spring Water

(Pro Edition)

Arctic Cold Spring Smart Water Dispenser

Drink Arctic Cold Spring, Activate Your Energy

ARCTIC POWERED
VITALITY ACTIVATED

The remote and mysterious Arctic holds
the fountain of life.

The average temperature in the Arctic remains below -10℃ year-round, preventing the growth of bacteria, viruses, and other microorganisms in the water.

The permafrost layer acts as a natural barrier, isolating surface pollutants and serving as a natural "filter" to ensure the stability and purity of groundwater.

The Arctic ice cap, formed from tens of thousands of years of accumulated snow, undergoes a filtration process as the glacial water melts, resulting in even greater purity.

The unique Arctic climate makes it one of the world’ s rare "natural premium water sources."

Arctic Cold Spring: UNESCO-Certified "World’ s Purest Water"

High

High purity

Small Molecule Cluster Water

Sweet taste

Rich in beneficial minerals

Mildly Alkaline Water

Consistent water temperature and stable water quality

Regions within the Arctic Circle, such as Iceland, northern Norway, northern Sweden, and Finland’ s Lapland (home to Santa Claus Village), are renowned for their longevity, with an average life expectancy approaching 85 years.

Scientists have discovered that this is linked to the long-term consumption of Arctic cold spring water.

The active factors in Arctic cold spring water penetrate at a quantum level, selectively activating the mitochondrial electron transport chain and significantly enhancing ATP synthesis efficiency, leading to cascading cellular energy regeneration.

Drink Arctic cold spring water and experience an energy tsunami at the cellular level!

Spring Water
Intelligent Polar Energy Water

Purification

Purification rate: >99.9%

Mineralization

Rich in multiple beneficial minerals

Magnetization

Small Molecule Activated Water

Cooling

10℃ cold water

Hydrogenation

Hydrogen content: 800–1300 ppb

Quantum-Level Purification: Arctic Pure Water at Your Fingertips

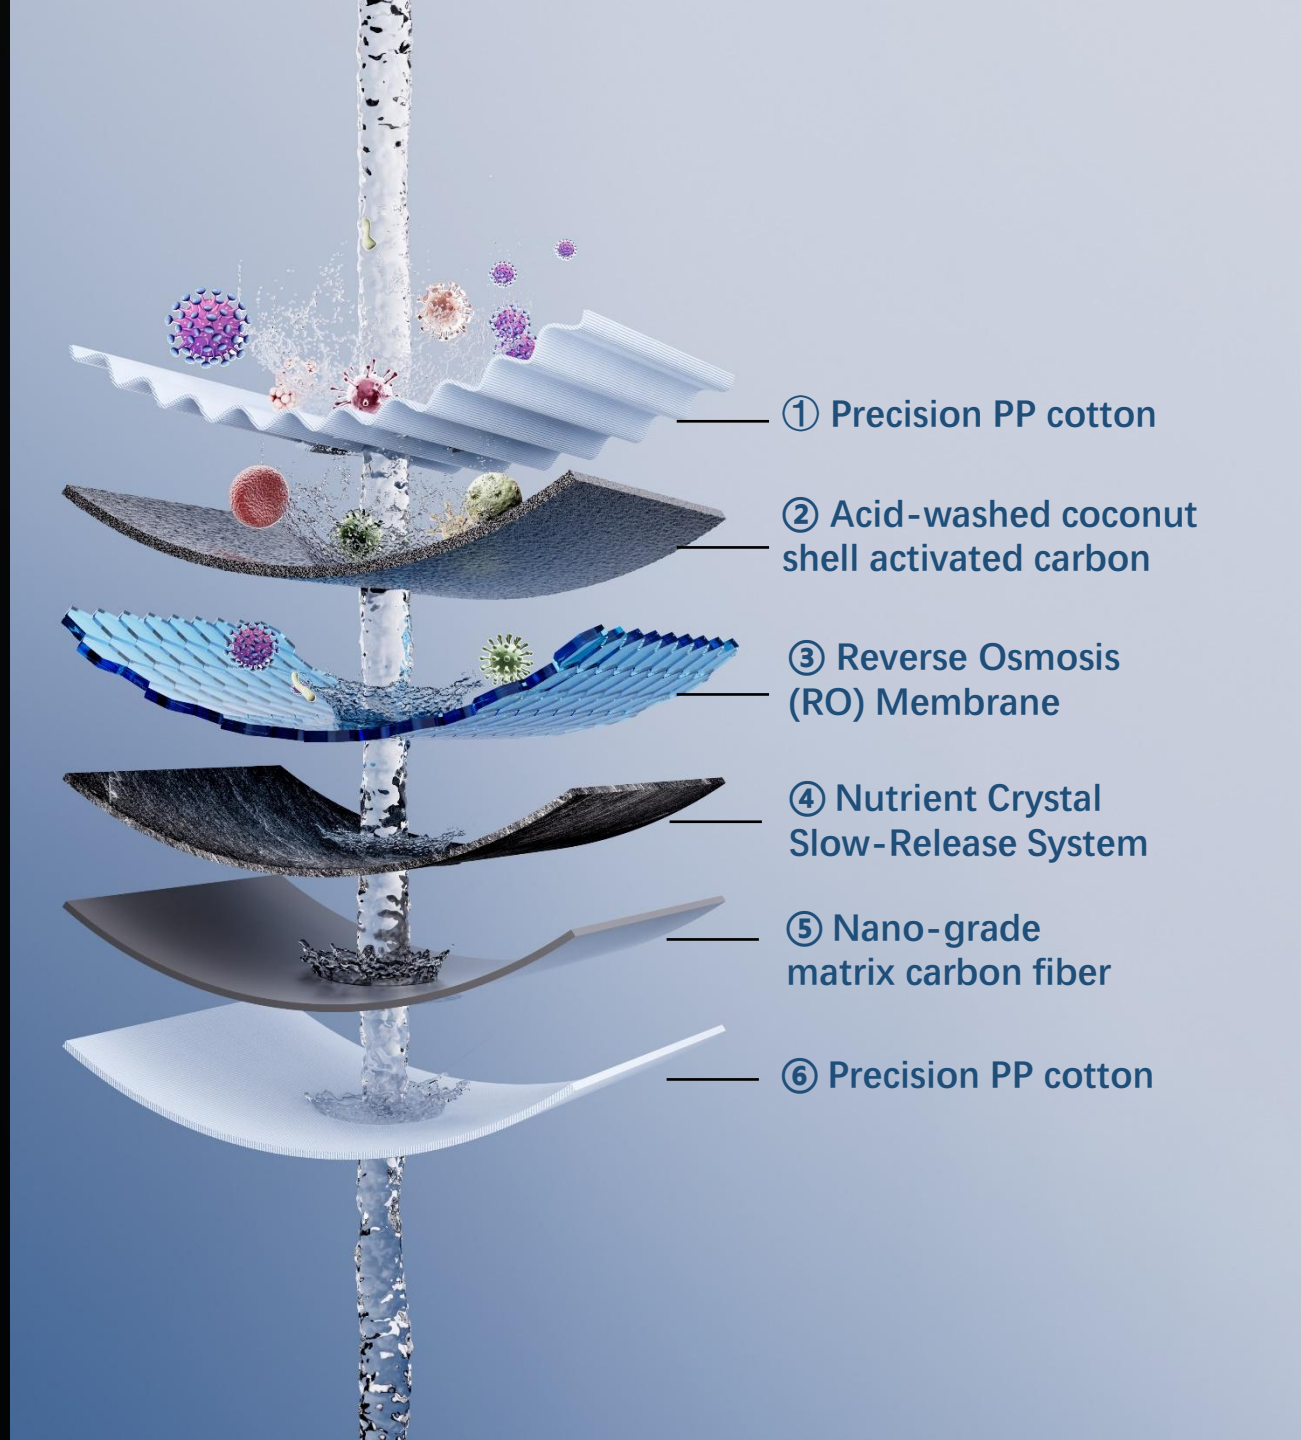

Smart composite core

Filtration precision reaches 0.0001μm, capable of removing hundreds of harmful substances with an overall removal rate of over 99.9%.

Smart rinsing

Automatically flushes every 24 hours for enhanced safety and health.

Bacteria removal rate	Virus removal rate	Heavy metal removal rate	Residual chlorine removal rate
> 99.9%	> 99.9%	> 99.9%	> 99.9%

Mineralization: The nutrient crystal slow-release system **restores Arctic minerals.**

Nutrient Crystal Slow-Release System

Crafted from Arctic cold minerals, this system gradually releases beneficial minerals including potassium, calcium, zinc, magnesium, strontium, and metasilicic acid. The mineral content is well-balanced and scientifically formulated.

Sweet taste

Enjoy the natural taste of Arctic cold spring water.

Rich in Strontium Needed by the Human Body

Strontium content ≥ 0.20 mg/L

Mildly Alkaline Water

After mineralization, the water has a pH of 7.3–7.8

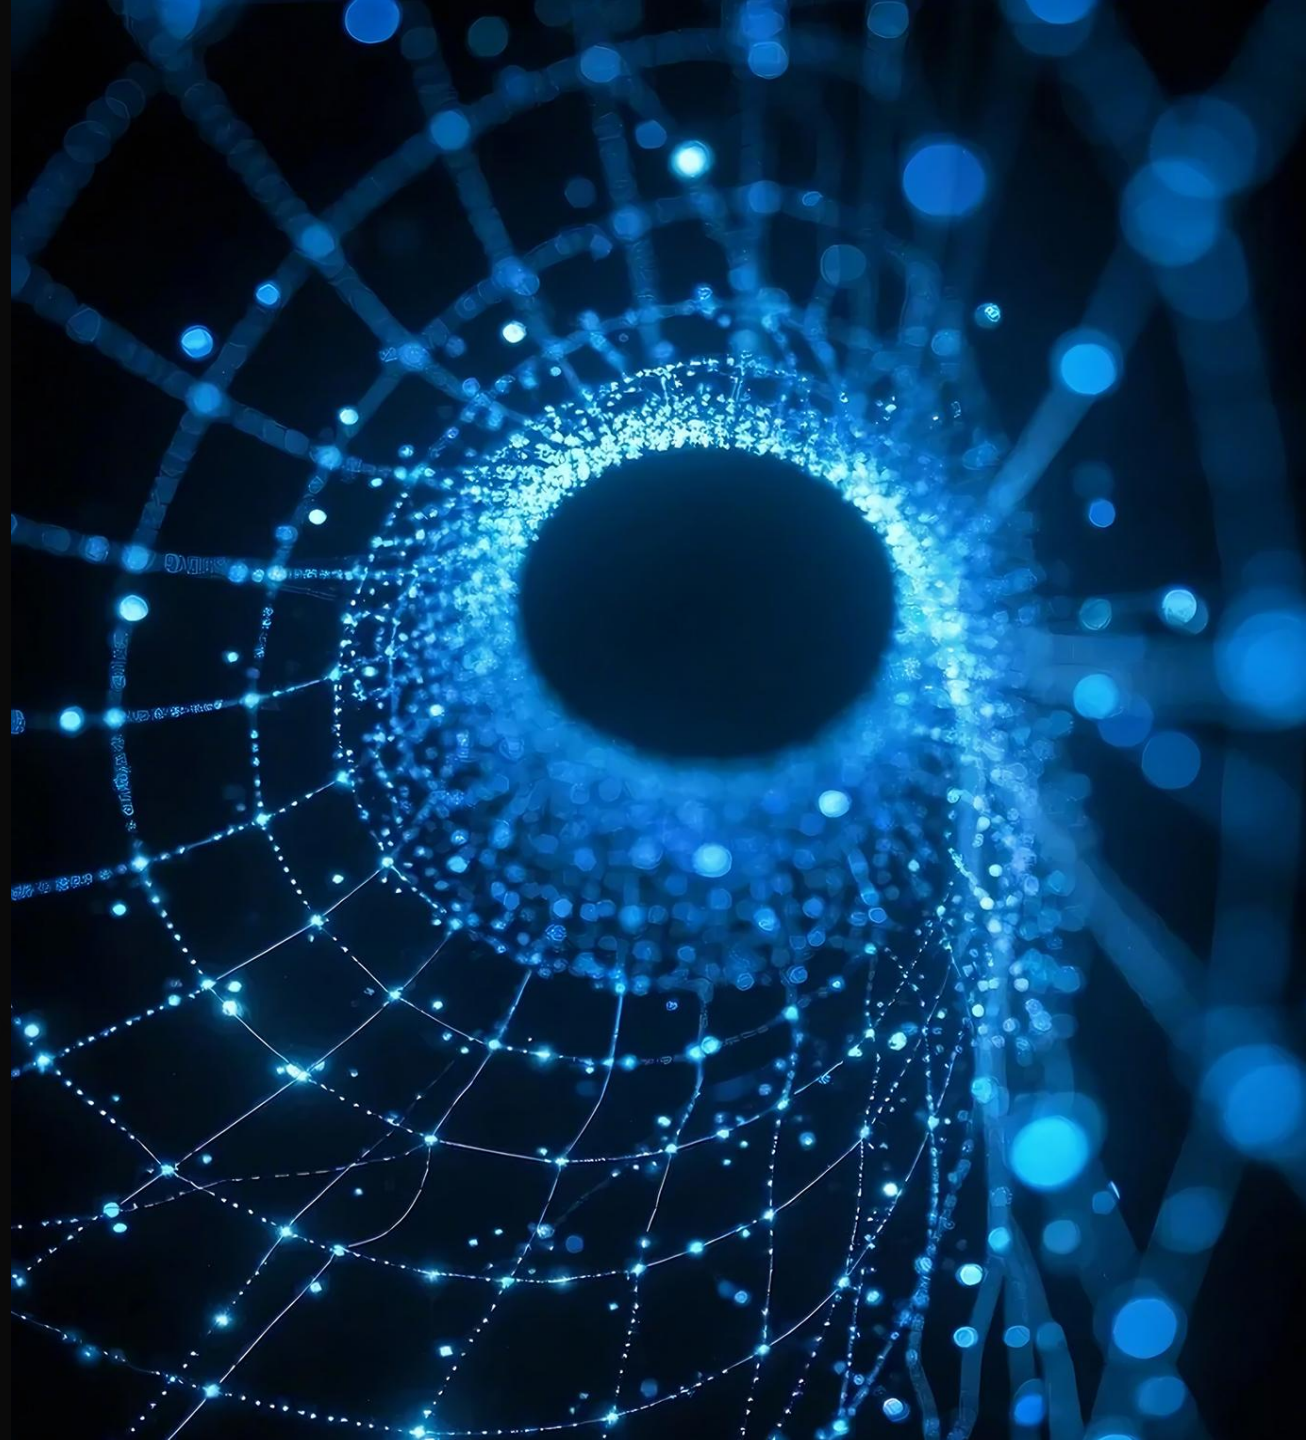

Magnetization: Molecular-Level Reconstruction, Reaching the Core of Life

Simulating the Arctic magnetic field to induce and activate water molecules

Through a 0.5 Tesla magnetization unit, the directional magnetic field induces the alignment of water molecule dipole moments, reducing water molecule clustering, enhancing water's "polarizability," and achieving preliminary activation of the water structure.

MRET Low-Frequency Resonance Technology

Low-frequency resonance technology can break down large molecule cluster water into small molecule cluster water, while transforming aggregated cluster-like water arrangements into linear arrangements, making it easier to penetrate cell membranes, activate mitochondria, and provide energy to cells.

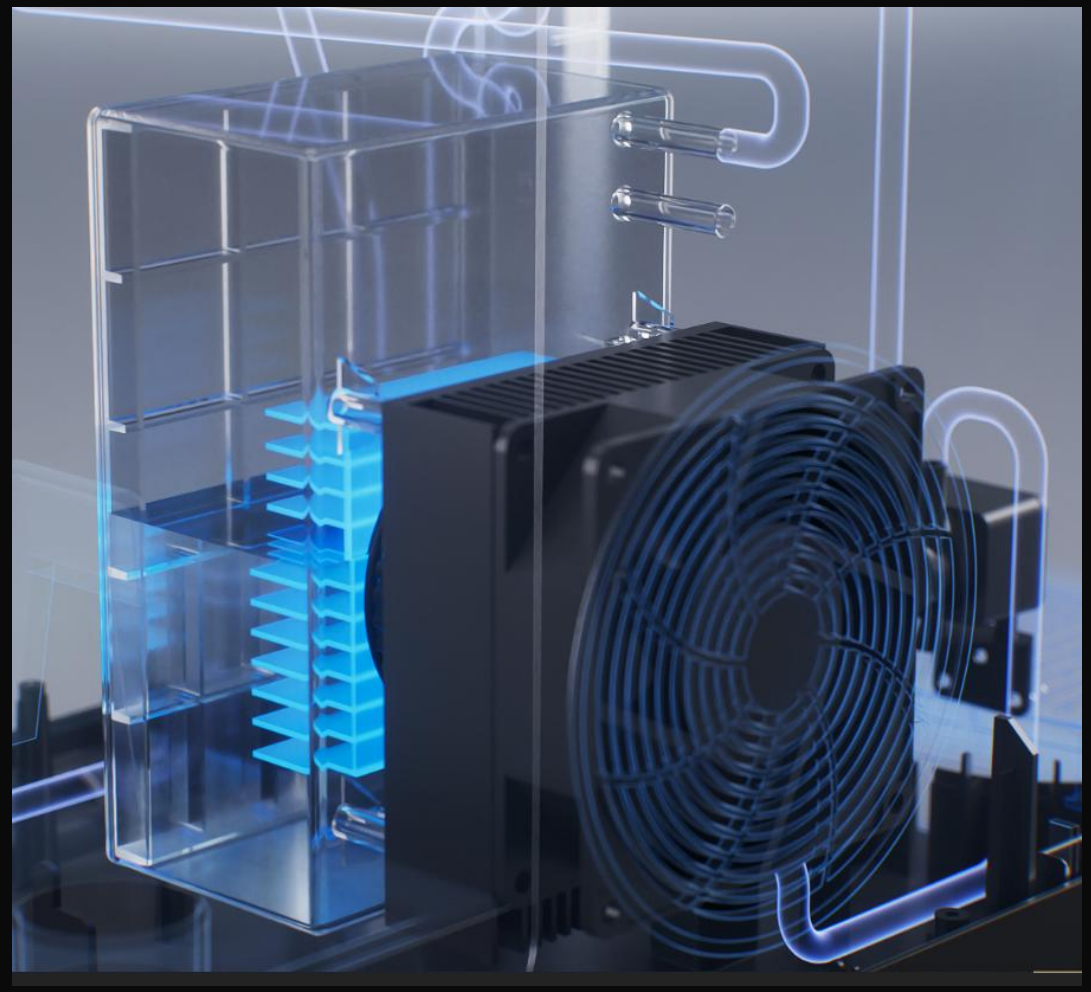

Cold Infusion:
Smart Cooling Tech, Arctic-Spring Fresh

Advanced Thermoelectric Cooling

Compact, low-energy, refrigerant-free system achieves a constant 10°C cold-water output.

Double-Insulated Ice Tank

Double-foamed insulation for superior retention. 0.8L capacity ensures refreshing Arctic spring water anytime.

Hydrogen Infusion:
Hydrogen-Rich Living Water, Antioxidation for Vitality

Nano-Ceramic Hydrogen Dissolution System

Stably produces hydrogen-rich water with a concentration of 800–1300ppb*, tailored to human health. Low noise, long lifespan, fast hydrogen production, and steady hydrogen blending.

SPE Electrolysis Module

Faster hydrogen generation and higher efficiency.

Physical Hydrogen Mixing Tech

Enables stable hydrogen enrichment in cold, room-temperature, and hot water.

Break Through Water Limits,

Enjoy Customized Water

AI Intelligent Control,

Extreme Spring Simulation,

Health Enhancement

Five-in-One Smart Composite Core, Leading Core Technology

	Layer / Material	Function
	Precision PP Cotton (5μm Folded)	Filters out sediment, rust, suspended particles, and more
	Activated Carbon (Coconut Shell Activated Carbon)	Adsorbs residual chlorine, discoloration, odors, and removes organic pollutants
	Reverse Osmosis (RO) Membrane	Removes bacteria, viruses, heavy metals, and other contaminants from water
	Nutrient Crystal Slow-Release System	Releases beneficial minerals such as potassium, calcium, magnesium, and strontium
	Nano-grade matrix carbon fiber	Adsorbs residual chlorine for final purification
	Precision PP cotton	Captures stray carbon particles, improving taste

Thick-Film Instant Heating Technology, Say Goodbye to Repeatedly Boiled Water

Drink hot water without waiting
—one-touch access, drink whenever you want
Three Temperature Modes, Effortless Operation

Thick-Film Instant Heating Technology

Heats water in 3 seconds,
no need to boil water multiple times

VS

Hot Tank Heating

Repeated boiling results
in repeatedly boiled water,
requiring a wait to reheat after use

Large-Capacity Split Water Tank, Convenient to Use

Split Integrated Water Tank Raw

Water Tank: 3.8L + Wastewater Tank: 1.6L

Built-in 1.0L Purified Water Tank and 0.8L Iced Water Tank

Digital Touchscreen for Real-Time Water Quality Monitoring

Real-time display of TDS levels for both raw and purified water

Real-time percentage display of filter cartridge lifespan

Digital capacitive touchscreen operable even with wet hands

Simple and intuitive control buttons—easy to use for parents and the elderly

Child lock design for enhanced safety and peace of mind

One-Hand Filter Replacement as Easy as Opening a Drawer

Audible alert sounds when the filter cartridge needs replacing

Replace the filter with a simple lid opening—quick and effortless

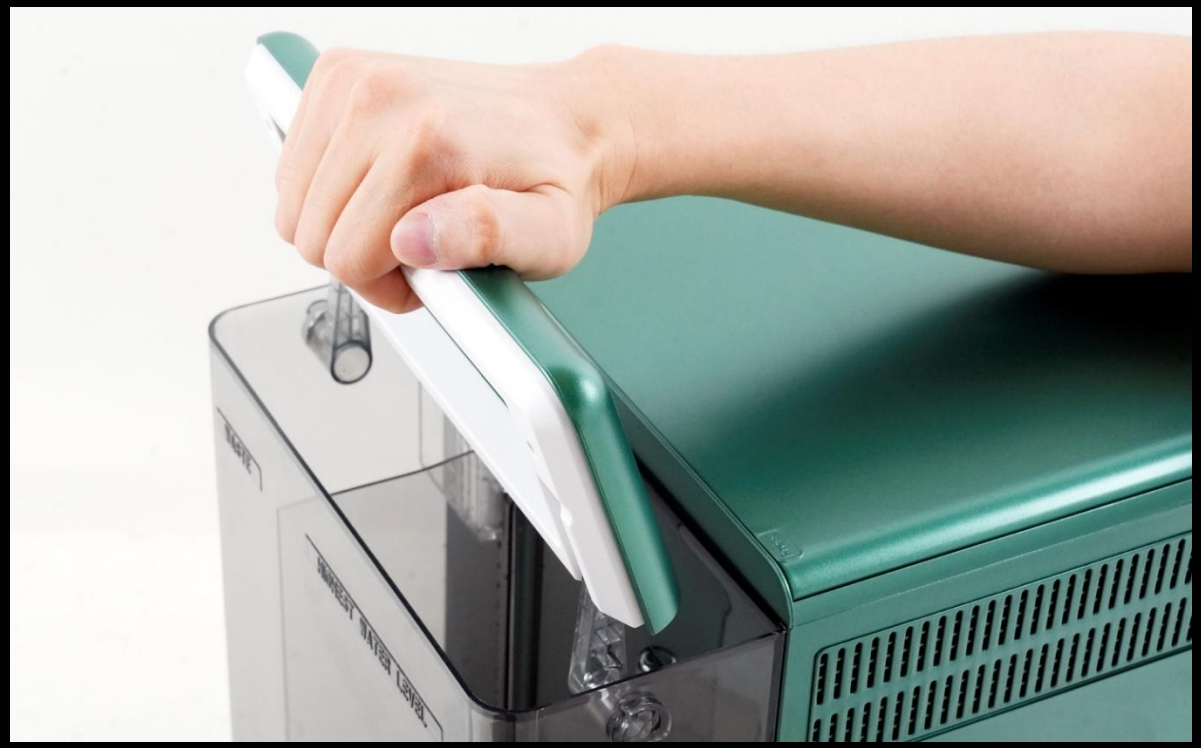

Dual Water Supply Modes to Suit Diverse Scenarios

Flexible Mode – No Installation Required

Comes with a built-in water tank for manual filling, suitable for various household settings without the need for installation

Fixed Mode – Pipelined Water Supply and Drainage

Rear water tank can be directly connected to water inlet and drainage pipes, allowing fully automated water refilling and discharge

Healthy Water, Anytime You Like

- Chilled / Warm Water
- Brewing tea
- Making coffee
- Preparing milk
- Fruit-infused tea
- Cooking rice and making soup
- Applying a face mask
- Hangover relief

Home use
