Product Advantages

Safe And Non-Invasive	It is a type of physical therapy. Magnetic therapy has no side effects, is healthy and comfortable, just like having a biological SPA. It is easy for everyone to accept and persist.
Simultaneous Improvement Of Multiple Symptoms	By activating cells to promote the microcirculation of the body, it improves the root cause of sub-health problems, and various discomfort symptoms.
Simple Operation	One-button operation, multiple channels, intelligent adjustment, can be used at home and office.
Family Sharing	One instrument, shared by many people, low cost, high benefit, the choice for the whole family.

OlyLife Tera-P90

The Fifth Element - Geomagnetism

Five longevity villages recognized in the world:

Bama Guangxi,China
Hotan Xinjiang,China
Caucasus Region in Armenia
Hunza Valley in Pakistan
Vilcabamba in Ecuador

After years of research by scientists, they found that they have one thing in common-

The strength of the geomagnetic field exceeds other areas of the world!

Uncover the Fifth Element of Life - Magnetic Field

Did you know that life on Earth happened when its magnetic field was formed and increased? The magnetic field creates a colossal magnetosphere that protects the earth from the invasion of the outside world. Only by living in a healthy magnetic field good health and continuation of life are guaranteed. Therefore, like sunlight, air, water, and nutrition, geomagnetism is the fifth element for a life form to survive.

The World's First Person in Space - the Story of Gagarin

Shortly after Gagarin returned to earth from space, he developed symptoms such as dizziness, headache, insomnia and fatigue, unstable blood pressure, dermatitis, joint pain, emotional irritability, endocrine disorders, and memory loss. Doctors could not find out the specific cause. After repeated argument, the scientists concluded that when the human body entered space, it was far away from the earth's magnetic field, and the body experienced "magnetic starvation", which made Gagarin suffer from a short-term "magnetic deficiency syndrome".

Human health goes Hand in Hand with the Care of Geomagnetism.

Unfortunately, modern people are seriously lacking in the magnetic field!

01 The Geomagnetic field is Gradually Weakening

In the past 4,000 years, the Earth's magnetic field has weakened by almost 80%. Not only that, but due to ecological reasons such as the shortening of the poles, the elongation of the equator, the melting of glaciers, and rising sea levels, our connection to the Earth's magnetic field is weakening.

02 The Lifestyle of Modern People is almost Disconnected from Geomagnetism

a. We spend almost all of our lives in reinforced concrete buildings or vehicles made of steel, and these materials have the function of absorbing and shielding magnetic force;

b. Wires and cables like cobwebs and crisscrossed pipes are blocking the flow of nature's magnetism;

c. People seldom go to nature for activities, and thus difficult to obtain sufficient natural geomagnetism.

Insomnia

Headache

Sore Shoulders

Low Back Pain

Constipation

Fear Of Cold

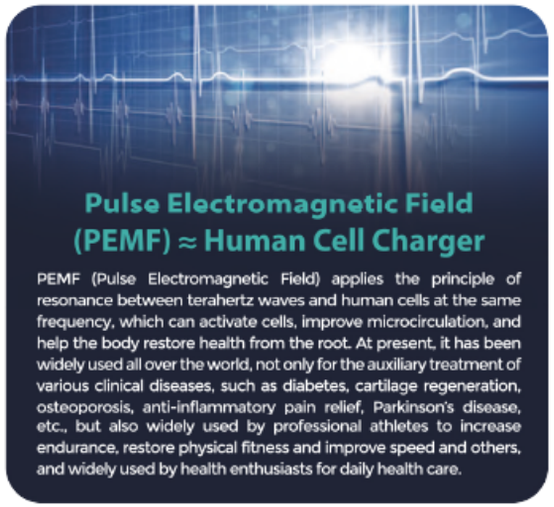

Dizziness

Fatigue

The stomach growls when it is hungry, but when the body is "magnetically hungry" it cannot be touched, seen, or felt in a short time!

Therefore, under the long-term lack of magnetic force, coupled with the harm of external harmful substances and the influence of life pressure, our health has already been seriously overdrawn, and it is imminent to improve the sub-health state.

Pulse Electromagnetic Field (PEMF) ≈ Human Cell Charger

PEMF (Pulse Electromagnetic Field) applies the principle of resonance between terahertz waves and human cells at the same frequency, which can activate cells, improve microcirculation, and help the body restore health from the root. At present, it has been widely used all over the world, not only for the auxiliary treatment of various clinical diseases, such as diabetes, cartilage regeneration, osteoporosis, anti-inflammatory pain relief, Parkinson's disease, etc., but also widely used by professional athletes to increase endurance, restore physical fitness and improve speed and others, and widely used by health enthusiasts for daily health care.

OlyLife Tera-P90

Scientific Health Preservation For A Healthy Life

- Activates Cells
- Improves Microcirculation
- Improves Vitality
- Dredges The Meridians
- Expels Cold And Dampness

The THz Tera P90 uses the principle of resonance between terahertz waves and human cells at the same frequency to release precise terahertz waves (8-1000um). Like a charger for human cells, it starts from the soles of the feet and spreads all over the body, replenishes biological energy, and allows the body to "cleanse" from the inside out.
